

MODRULJ

Direktorske stolice imaju naslone za glavu, izrađene od termoplastičnog materijala, poliuretanske pene i tapacirane istim materijalom kao i deo za sedenje.

Director's chairs have headrest, constructed by thermoplastic material, polyurethane foam and upholstered with the same fabric as the seating plate.

Aktivacija gasnog lifta za podešavanje visine se postiže pomoću poluge koja je dostupna bočno ispod sedišta.

The activation of the height adjusting gas lift is achieved through a lever which is accessible sideways under the seat.

Podešavanje nagiba naslona
Postoji pet različitih položaja za nagib sedišta. Nakon otključavanja sedišta i leđa, možete promeniti poziciju pomoću pritiska vašeg tela.

Tilt adjustment of the backrest
There are five different positions for a seat - back reclination. Having unlocked the seat and the back, you can change the position using the pressure of your body.

Naslon se sastoji od anatomskog okvira izrađenog i formiranog od termoplastičnih poliamidnih profila na koje je postavljen mrežni naslon na način koji obezbeđuje ravnomernu raspodelu pritiska. Povezan je pomičnim mehanizmom sa ugaonom čeličnom pločom. Mehanizam naslona obezbeđuje prilagođavanje istog svakom pokretu tela (desno, levo, napred, nazad).
The backrest, consists of an anatomical frame made of formed and welded thermoplastic polyamide profiles, over which a mesh backrest is applied, in a way that ensures even pressure distribution. It is connected with the recline mechanism with a corner steel plate. The backrest mechanism provides adaptation to each body's movements (right, left, front, back).

Ploča za sedenje je izrađena od termoplastičnog poliamida (PA6). Na ploči za sedenje se nalazi jastuk od ekspanzirane poliuretanske pene debljine 60 mm, koji je tapaciran materijalom po izboru. Postoji mogućnost podešavanja dubine sedeće ploče od 0-60 mm i 7 položaja zaključavanja.

The seating plate is made of thermoplastic polyamide (PA6). On the seating plate lies a cushion made of expanded polyurethane foam with 60 mm thickness, which is upholstered with the chosen fabric. There is an option to adjust the seating plate's depth from 0-60mm and provides 7 locking positions.

Naslone za ruke sedišta su izrađeni od termoplastičnog poliamida i podešivi po visini sa opsegom podešavanja od 70 mm. Kontaktna površina ručica je izrađena od livenog poliuretana srednje tvrdoće za veći komfor i ergonomiju i mogu se takode pomerati napred i nazad na 6 pozicija (5 nivoa)

The seat armrests are made of thermoplastic polyamide and adjustable in height with a 70 mm adjustment range
The contact surface of the arms is made of cast polyurethane of medium hardness for greater comfort and ergonomics and can also be moved back and forth in 6 positions (5 scales)

Podešavanje težine se postiže pomoću regulacionog zavrtnja koji je postavljen ispred i ispod sedišta.

The weight adjustment is achieved through a regulator screw which is positioned in front of and under the seat area.

Seriya ergonomskih radnih stolica M 290 nudi pravo rešenje za savremen ambijent gde zaposleni provode mnogo vremena sedeći za računarom. Ove radne stolice su pravljene i dizajnirane prvenstveno vodeći se potrebama IT industrije jer zaposleni u ovom sektoru sede u istom položaju po nekoliko sati fiksirajući pogled i položaj tela. Baš to uzrokuje bolove i ukočenost. Serija M290 neutrališe taj problem..

The ergonomic work chair series M 290 offers the right solution for a modern environment where employees spend a lot of time sitting behind the computer. These work chairs have been made and designed primarily to meet the needs of the IT industry because employees in this sector are sitting in the same position for several hours fixing the view and position of the body. That's exactly what causes pain and stiffness. The M290 Series neutralizes this problem.

Mogućnost izbora pvc zvezda, točkica, stopica, liftova, rukonaslona, naslona za leđa, boja i materijala. The possibility of choosing a pvc star, wheel, stop, elevator, armrest, backrest, color and material.

Inovativna kancelarijska stolica razlikuje se po svom ergonomskom dizajnu i estetici. M290 stolica direktno odgovara promeni pozicije tela tokom rada, uz automatsko podešavanje naslona na zadnjoj strani korisnika. Osnova je od pet krakova zvezde od aluminijuma, polirane ili obojene elektrostatičkom bojom.

Podešavanje visine sedišta sa gasnim klipom. Naslon ima anatomski okvir na kojem je postavljena elastična mreža, tako da se pritisak ravnomerno raspoređuje. Takođe ima mehanizam uz pomoć kojeg se prilagođava prirodnim pokretima tela.

Sinхро mehanizam dozvoljava sinhronizovanu kosinu naslona i sedišta u 5 položaja. Mehanizam poseduje sistem -protiv panike- za nesmetanu i kontrolisanu podršku i podešavanje sistema za balansiran nagib u zavisnosti od težine korisnika.

Rukonasloni se mogu podešavati po visini i širini. Izbor tapacirunga postoji u sedam kategorija sa širokim rasponom boja.

An innovative office chair distinguished for its ergonomic design and aesthetics. The M290 chair responds directly to body posture change during work, with automatic adjustment of the backrest on the back of the user.

The base is five-star made of die-casted aluminium, polished or painted with electrostatic paint.

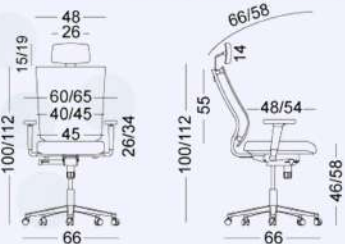

Seat height adjustment with gas piston.

The back has an anatomical frame on which a net is placed, in such a way that the pressure is evenly distributed. The back has a mechanism so that it adapts to the natural movements of the body.

The Synchro mechanism allows for a 5-position synchronized back and seat recline. The mechanism features an anti-panic system for smooth and controlled back-up and adjusting system for balanced tilt depending on user's weight.

The seat arms are adjusted in height and width.

Selection of upholstery from seven categories with a wide variety of colors.
